THE WHIG PLATFORM.

The Whigs of the United States, in Convention assembled, firmly adhering to the great conserva-tive republican principles by which they are controlled and governed, and now, as ever, relying upon the intelligence of the American people, with an abiding confidence in their capacity for self-government and their continued devotion to the constitution and the Union, do proclaim the following as the political sentiments and determinafor the establishment and maintenance of tions for the establishment and maintenance of which their national organization as a party is

1. The government of the United States is of a limited character, and it is confined to the exercise of powers expressly granted by the consti-tution, and such as may be necessary and proper for carrying the granted powers into full execu-tion; and that all powers not thus granted or

tion; and that all powers not thus granted or necessarily implied are expressly reserved to the States, respectively, and to the people.

2. The State governments should be held secure in their reserved rights, and the general government sustained in its constitutional powers, and the Union should be revered and watched over as "the palladium of our liberties."

3. That while struggling freedom a years have

3. That, while struggling freedom everywhere enlists the warmest sympathy of the Whig party, we still adhere to the doctrines of the Father of his Country, as announced in his Farewell Address, of keeping ourselves free from all entangling alliances with feature party of the structure. gling alliances with foreign countries, and of never quitting our own to stand upon foreign ground. That our mission as a republic is not to propagate our opinions, or impose on other countries our form of government by artifice or force, but to teach by example, and show, by our success, moderation, and justice, the blessings of self-government and the advantages of free in-

4. That where the people make and control the government, they should obey its constitution, laws, and treaties, as they would retain their self-respect and the respect which they claim and will enforce from foreign powers.

5. Government should be conducted upon prin-

ciples of the strictest economy, and revenue sufficient for the expenses thereof, in time of peace, ought to be mainly derived from a duty on imports, and not from direct taxes; and in levying such duties, sound policy requires a just discrimi nation, and protection from fraud by specific duties when practicable, whereby suitable encouragement may be assured to American industry, equally to all classes and to all portions of the

6. The constitution vests in Congress the power to open and repair harbors, and remove obstructions from navigable rivers; and it is expedient that Congress should exercise that power, when-ever such improvements are necessary for the common defence, or for the protection and facility of commerce with foreign nations or among the States; such improvements being, in every instance, national and general in their character.
7. The federal and State governments are parts

of one system, alike necessary for the common prosperity, peace, and security, and ought to be regarded alike with a cordial, habitual, and minovable attachment. Respect for the authority of each, and acquiescence in the constitu-tional measures of each, are duties required by the plainest considerations of national, of State, and of individual welfare. 8. The series of acts of the 31st Congress com-

monly known as the Compromise or Adjustment (the act for the recovery of fugitives from labor included) are received and acquiesced in by the Whigs of the United States as a final settlement, in principle and substance, of the subjects to which they relate; and, so far as these acts are concerned, we will maintain them, and insist on their strict enforcement, until time and exerience shall demonstrate the necessity of further legislation, to guard against the evasion of the laws on the one hand, and the abuse of their powers on the other-not impairing their present efficiency to carry out the requirements of the constitution; and we deprecate all further agitation of the questions thus settled, as dangerous to our peace, and will discountenance all efforts to continue or renew such agitation, whenever, wherever, or however made : and we will maintain this settlement as essential to the nationality of the Whig party and the integrity of the Union.

J. G. CHAPMAN, of Maryland,

President of the Whig National Convention.

Mexican Mustang Liniment!

READ the following proof of what we have long since ascerted, viz: that the Mustang Liniment is the sinc qua non of all external remedies ever before offered to the

"Wm. M. Johnston, No. 112 Second street, Pittsburg, says that he had a severe attack of Rheumatism in his right hip after suffering some ten days, the left hip also became affected, and he was obliged to 'lay up.' The pain was constant and excruciating. He had heard of the wonderful effects of the Mustang Liniment in Rheumatism, and determined to try it. One small bottle, thoroughly applied, performed a perfect cure! B. H. Meakings, 189 Walnut street, Cincinnait, was confined to his bed and under treatment of a physician some six weeks with Neuralgia of the whole of his right side, leg, arm, and face. His sufferings were indescribable, and the only ecssation from the most agonizing pain was while under the influence of opium or morphine. His doctor finally advised him to try the Mustang Liniment; he did so, and in two days was able to go about his business, perfectly cured."

did so, and in two days was able to go about his business, perfectly cured."

"The LAME MADE TO WALK.—About the first of April I cut and laid open the fore finger of my left hand, through the bone and across the second joint, nearly dissevering it from the hand, being about two-thirds off. I was fearful that I should lose the use of my finger forever; but I bound it up with the Mexican Mustang Liniment, and it soon healed up, and is now perfectly well, though somewhat scarrified. I used nothing but the Mustang Liniment.

"About one week ago I had the misfortune to cut the cap of my left knee in two with the sharp corner of an axe. The cap was split assunder, and for a day or two I could not use my leg at all, and I was afraid that I would lose its use forever. The cap was split assunder, and for a day or two I could not use my leg at all, and I was afraid that I would lose its use forever. The cap was cut and cleft to the joint with a deep and alsrming gash, and it gave me great pain and uneasiness, lest I should be entirely deprived of the use of my leg. I applied the Mexican Mustang Liniment, and that alone, in both of the above cases, and I am now quite well, except the cap of my knee is a little swollen, and is tender about the cut, which is healed up and shows a fresh red appearance of about one inch and a half in length and a quarter of an inch in width, but gives me no inconvenience whatever.

"I walked fifteen miles yesferday out of the thirty miles from the place where I live near the Sulphur Springs, in Jefferson county, and feel able to walk as many more today. My recovery has been so wonderful that I feel it my duty to make it public, that the world may know the value of the Mexican Mustang Liniment.

"Sulphur Springs, Juff. Co., Mo."

PRICES OF THE LINIMENT.

It is put up in bottles of three sizes, and retails at 25 cents, 50 cents, and \$1 per bottle. The 50-cent and dollar bottles contain 50 and 100 per cent more I Miniment, in proportion to their cost, so that money is saved by buying the large s

Dicarions elegant musin and lace Undercurtains, embroidered in application, unique raised, and rammaged or vine-work.

Rich Freuch and Swiss Oiled Furniture Chintzes.

We shall be receiving by the next packets the most extensive and best-selected stock of all kinds of Carpeting ever offered in this city for sale before.

Such are our facilities for obtaining goods in our department, (Furniture,) that we can confidently assure all house-keepers in want of anything we keep that they can do far better by making their purchases in our city than any other we know of. As we get all our goods from first hands, and sell them under about four-fifths the expense that Northern retailers are under, the reason is obvious. All who would wish to feast their eyes are cordially invited to our ware-rooms, one door east of the corner of Pennsylvania avenue and 9th street, and we will do our best to entertain them at any time through the season.

SEQ 2—03tif CLAGETT & DODSON.

MACHINE FOR CRUSHING, GRINDING, AND

Recently Patented in this Country and Europe. Recently Patented in this Country and Europe.

COCHRAN'S PLANOSPHERICAL QUARTZ CRUSHING AND PULVERHING MACHINES are now in daily operation for the
inspection of the public, and will be submitted to any reasonable practical tests proposed by parties interested.

These machines, by their simplicity of construction, their
durability, the undoubted principles upon which they operate, their effective operation and result, are justly entitled
to the consideration of all parties engaged in grinding,
crushing, and Pulverizing Quartz, Iron Ore, Zinc, Copper,
and Lead Ores, and all other Ores or Mineral substances.

It is the peculiar feature of the economy of these machines that they are found capable of crushing and pulverizing into the finest powder any amount of Quartz or other
earthy matter, in proportion to the amount of weight or
power applied. The earthy matter is so completely ground
and pulverized, that the Gold may be easily separated, and
subjected to any process of amalgamation that may be necessary.

The machines work and deliver wet or dry, as may be re-

subjected to any process of amalgamation that may be necessary.

The machines work and deliver wet or dry, as may be required, and run with little friction, (being almost without machinery,) requiring no lubricating; the principle upon which they operate precludes the possibility of their being put out of order; nor do they heat any material while being put over itself. They are at once applicable for all purposes of grinding and pulverizing, from those required by the Druggist to those of the most extensive operations in California and Australia.

These machines are from two to twelve feet in diameter, with balls or spheres from three inches to five feet in diameter, each machine weighing from 250 pounds to 20 tons each, and are sold, with the right to use them, at from \$100 to \$5,000 each.

cach, and are sold, with the right to use them, at from \$200 to \$5,000 each.

They can be worked by steam, water, horse or manual power, according to their size; and by changing the velocity and proportioning the weight on the top of the balls, any desired amount of power may be used, from that of a man or horse upward.

The proprietors of this invention solicit examination, and well prove by practical tests the wast superiority and economy of these machines over any other, for crusking, grinding, or pulverizing, heretofore affered to the public.

These machines may be seen in operation at the foot of South Eighth Street, Williamsburgh, at the large Patent Block and Saw Factory of Messra. Burr, Waterman & Co., first street south of Peck Sip Ferry, every day, from 7 to 9 a.m., and from 4 to 6 p. m. For further particulars, apply to E. & J. BUSSING & CO., aug 23—2w 32 Cliff street, New York.

THE LOST SENSES: DEAFNESS AND BLIND THE LOST SENSES: DEAFNESS AND BLIND-NESS. By Dr. Kitto.

"This is a work of great interest, from one of the most learned and accomplished writers of the age, revealing the mysteries of the world in which those live who have been deprived of the sense of sight or hearing. Ever since his boyhood, for more than thirty years, Dr. Kitto has passed a life of great activity as a scholar, in a state of the most intense deafness to which any living creature can be subjected. His necount of himself, and of his discriminating remarks on the condition of the blind, (James Mitchell, Laura Bridgeman, and others,) are replete with profound thought on the interesting phenomenon presented in the progress of their mental training."—Christian Observer.

Classical & Mathematical School

THE subscriber proposes to open in the city of Washington, on the 13th of September, a Classical and Mathematical School of a high order. For this purpose he has seared a central and very desirable location on the south side of F street, three doors west from 13th.

The number of pupils will be limited to twenty. To these he will devote his exclusive attention, in preparing them for college or for business and professional pursuits.

It is the design to make this a permanent Classical and Mathematical School, with a number so limited that each pupil may receive a large share of the teacher's attention; and the result of his own experience and that of others convince him that he can in this way accomplish much more for their mental and moral improvement, and for their thorough and rapid progress in study, than can be done in a school of a larger number or of a more miscellaneous character.

school of a larger number or of a more miscellaneous character.

From the views expressed to the subscriber by intelligent persons, it is believed there are many in this city who desire the establishment of such a school at the present time; and all of his energies, guided by his past experience in the instruction of youth, will be devoted to making it, in all respects, worthy of the confidence and patronage of those who may be disposed to place their sons under his charge. Terms, per quarter, \$12.50.

Refer to the faculty of Columbian College; to Col. J. L. Edwards; Col. Peter Force; William Gunton, esq.; Rev. R. W. Cushman; Hon. Wm. Morgan, Treasury Department; D. T. V. Lench, esq., Post Office Department.

Address the subscriber, through the City Post Office. sept 2—ec2w*

Protection from Lightning. Protection from Lightning.

The undersigned, being the duly appointed Agent of Spratt's Electrican and Electro-Metallurghs Lightning. The undersigned, being the duly appointed Agent of Spratt's Electrican and Electro-Metallurghs Lightning. And Electro-Desitive elements combined in their manufacture; thus rendering them equal to copper as conductors. They are in ten-feet lengths, with accurately-fitted brass-screw connecting joints, an entire new style of metallic (patentéa) attachments, for briek or frame buildings; also, glass isolaters, of a novel and ingenious construction, (patented,) forming a lock; the whole mounted with a solid platinum diver point, (patented,) twelve inches long, surrounded at the base with three angular negative magnets, which possess the power, to an extraordinary extent, of discharging the opposite elements of the most fearful thunderstorm, and embrace the entire perfection of science up to the present time; the whole constituting the most magnificent and perfect silent conductor ever presented to the public.

Safety has not been compromised by affording these excellent rods at such low rates; the greatest attention has been given to their construction, so as to be readily attached. The astonishing power of the negative magnets, in discharging the air of its opposite elements, has been clearly demonstrated by the Electrometer, when unmagnetized points have shown but slight results, though placed under the same conditions. In fact, they gather and sliently discharge electricity from the atmosphere when you would scarcely suspect any being present.

These improvements being secured by double letters patent, you are hereby cautioned against laying yourselves liable, by purchasing of those who are not authorized, or who are substituting inferior imitations. All sgents duly appointed can show their certificates. Have good rods or none.

CHARLES W. HEYDON, Washington City.

I do hereby certify that I have applied various powerful chemical re-agents to Spratfs Patent Points for Lightning-Rods, and that the results of these experiments convince ine that they will resist the action of atmospheric causes, and thereby preserve the extremity sharp—a condition most es-sential to protection against lightning. The reagents used in the above experiments were a solution of chloride of so-days, (company salt leastle seld, suphyric seld, and hydro-

dium, (common salt,) acetic acid, sulphuric acid, and hydro-chloric acid. With the first, there was no action on the metal; with the several acids, there was very slight—a fact sufficient to show that atmospheric influences would have no sensible effect.

CHICAGO, September 3, 1850.

This may certify that I have examined, somewhat critically, James Spratt's Patent Lightning Rods, and that I am of opinion that it is constructed on scientific principles. For combining durability, cheapness, and efficacy, I deem it equal, and I think superior, to any other rod ever offered for my inspection.

Angure. (A.) X. Z. BLANEY.

Pharm., Medical College, Ga.

The Lightning Conductors put up by Mr. Henry M. Smith; of this city, on the plan of Mr. Spratt, appear to me to be very well devised; and, in point of mechanical construction, are the best 1 have ever seen.

It is to be hoped that the use of these Rods may become general, as an important auxiliary defence against a danger which must be regarded as of no ordinary magnitude, to which all buildings are liable.

R. SILIMAN, Jr.,

Prof. of Chem. in the University of Louisville.

Louisville, January 27, 1861.

All orders left at ANDREW DUFFY'S Stove Manufactory, th street, will be promptly attended to; or at GEORGE BELL'S, Alexandria, Va., corner of King and St. Asaph sts. Philadelphia Type and Stereotype Foundry.
